Mercury Technology Services
News Release

MTS Forms Commercial Alliance with Philip Services Corporation (PSC)

Effective immediately MTS and PSC will cooperate to supply mercury decontamination services, consulting and waste management to industrial clients in the United States. PSC (www.pscnow.com) is one of the leading environmental remediation companies in North America with headquarters in Houston, Texas. MTS is a private consulting company specializing in mercury as a contaminant to industrial processes with offices in Houston and Bangkok. The initial market focus will be the upstream oil and gas production, gas processing, pipelines, refining and petrochemical manufacturing. Both MTS and PSC have extensive experience in providing services to clients in these areas.

Some of the services to be offered to clients include:

- Process evaluation for mercury impacts
- Well intervention monitoring and tool decontamination
- Process equipment decontamination
- Comprehensive air monitoring and HSE support
- Waste characterization and management
- Inspection and modeling of cryogenic separation equipment
- Mercury sorbent installation and replacement
